# 2018 SUMMER SCHOOLS

## Brussels

### Europe and the World

**17-30 June 2018**

Explore the main challenges facing the European Union through study visits and interactive seminars and debate with policy makers from institutions such as NATO and the European Parliament.

## Paris

### Revolutions

**15-28 July 2018**

Explore Paris through tailored seminars by expert academics on the theme of Revolutions in art, history and literature. Visit major sites such as the Louvre, Picasso Museum and Versailles.

## Urban Ethnography

**8-15 July 2018**

Study people, places, practices and things in the urban setting of the city of Paris.

## Canterbury

### European Security and Foreign Policy

**17 June – 1 July 2018**

Focus on the contemporary security issues facing Europe today and how European states are adapting their security role both within and beyond the European territory.

*“It was amazing to learn about Paris through philosophers, writers, painters and scientists. I learnt that Hemingway was right – Paris does stay with you, and I can now see myself living here.”*

**Sara Kilian**

Paris Summer Schools 'Revolutions' 2017

## From Plantagenet to Tudor – Kingship, Society and Political Culture in Late Medieval England

**17 June – 1 July 2018**

Gain first-hand experience in the medieval city of Canterbury using original primary sources to explore the background and origins of the Wars of the Roses, the relationship between climate and governance, and the political involvement of the commonality of the realm.

## Molecular Biology and IVF

**17 June – 1 July 2018**

Gain cutting-edge research skills in this ever-growing and increasingly important scientific discipline through hands-on generation of IVF embryos, chromosome analysis and fluorescence in-sit hybridisation.

## Sustainable Architecture and Landscape Design

**17 June – 1 July 2018**

Fulfill a design brief as you are led by a creative community that comprises of well-respected researchers, highly skilled architects, engineers and design professionals exploring specialisms such as landscape, sustainability and model making.

## Quantitative Methods

**17 June – 1 July 2018**

Undergraduate level. Study the core elements of statistical analysis covering a range of quantitative skill areas including regression, contingency tables and continuous data in a problem-based learning environment.

## Investigating the Social Mind

**1-15 July 2018**

Investigate recent research into Psychology relating to the 'social mind' and how this influences people's thoughts and behaviours. Gain a key insight into an important aspect of the human psyche through interactive seminars and experimental analysis.

## Global Business in a Dynamic Environment

**1-15 July 2018**

Explore the core theories and activities involved in International Business and the complexity of decision making on a global scale.

## Hidden Histories of the Second World War

**1-15 July 2018**

Investigate the complex, murky and messy reality of Britain at war through interactive seminars and analysis of both primary sources and recent historiography. Useful preparation for postgraduate study, this course explores the historical myths of the British war effort and considers the implications of the popular memory of the war on more recent issues, such as 'Brexit'.
