

Figure 1:
The trajectory of the wave glider carrying the island volcano monitoring system around Nishinoshima.

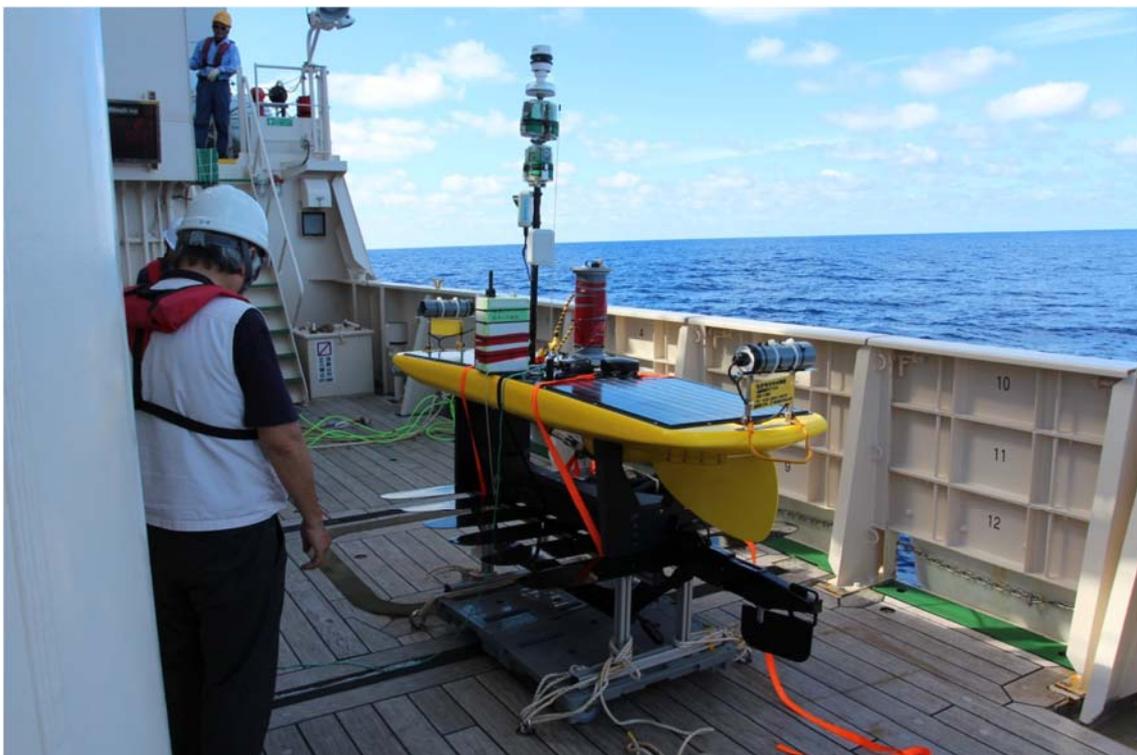

Figure 2: The wave glider about to be launched

Figure 3: The wave glider after being launched and Nishinoshima

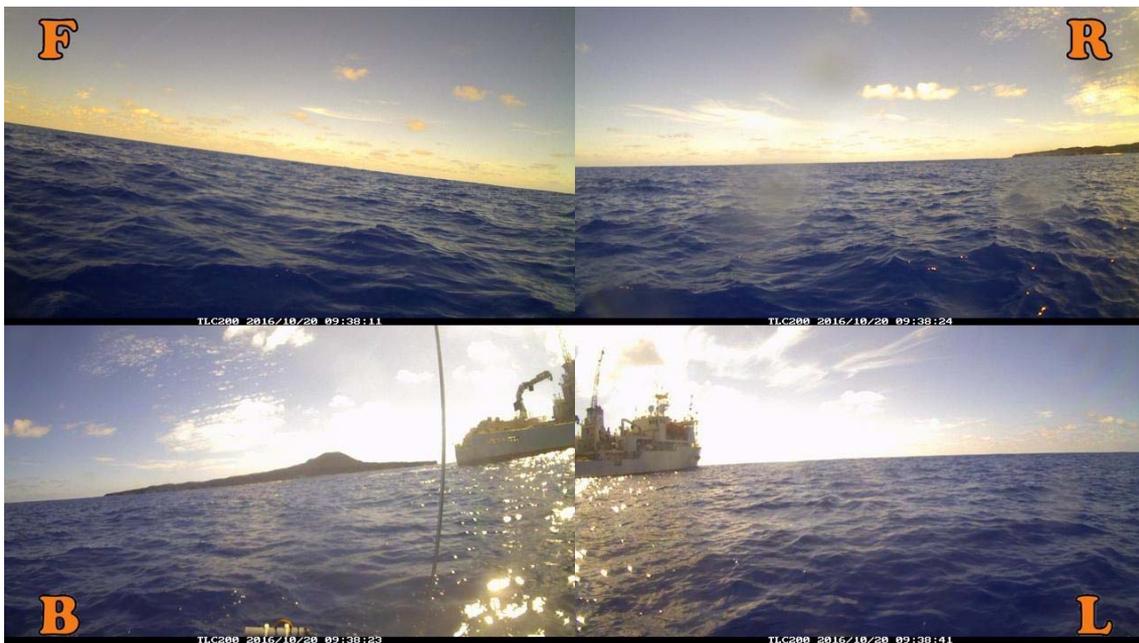

Figure 4: Photos from the WG taken directly after launch using 4 cameras (front, back, left and right).

Figure 5: Images of the recall taken by the wave glider

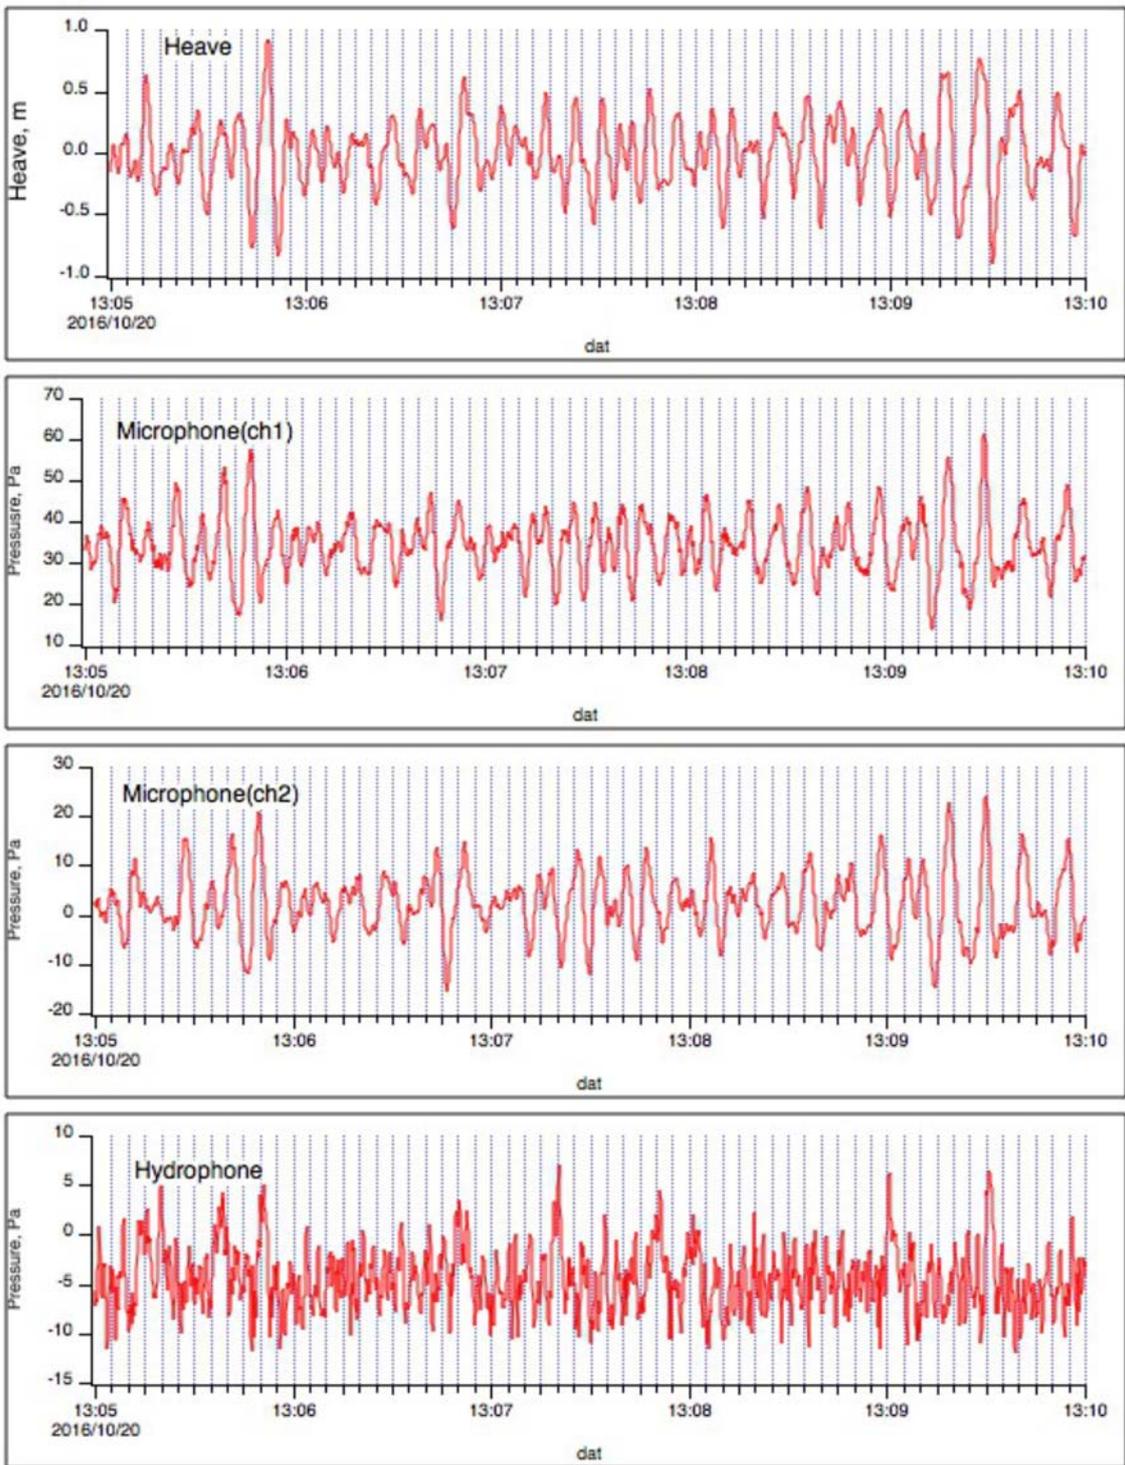

Figure 6: Simultaneous observation of heave (wave gauge), sonic waves (microphones 1 and 2), and underwater acoustic waves (hydrophone).
