GREETING FROM THE ACE COORDINATOR

ELLEN RETTIG-MIKI
ACE PROGRAM COORDINATOR
特命助教, SQLAC, KOBE UNIVERSITY
神戸大学大学教育推進機構国際コミュニケーションセンター

ACE Student Conference and Program

Welcome to our first ACE Student Conference here at Kobe University!

First year students in the Accelerated Course in English (ACE) Program are both hosting and participating in this conference. Today, these students will be giving presentations to showcase the results of their research tied to the ACE English Literacy and ACE English Communication classes in Q3-Q4 of this last academic year. During this conference, roughly 200 of these students will present—through poster presentations and formal oral presentations with PowerPoint—the results of their research and study. Poster presentations will be featured mostly at Centennial Hall in the morning, and oral presentations in the early afternoon at SOLAC in the D-Building of the Tsurukabuto #1 Campus.

The title of the conference is "New Directions for a Better Future". All of the presentation topics are on serious social, scientific, or technical issues our world faces, such as gender equality, water scarcity, nuclear power, free trade, impact of the internet on retail, online addiction, changes in marriage, fish depletion in oceans, renewable energy, wealth inequality, changing workplaces, and impact of social media. In the academic Q3, students had selected one of these general topics. After choosing an area of strong interest, students researched a more specific aspect of their chosen topic in depth, both writing about that topic and giving presentations on it.

This student conference allows students to experience the academic process of researching and presenting on a topic, and to present to a wider audience through the conference. Students are also involved in organizing and running the conference, through work on Program, Publicity, and Site Committees.

We are also pleased to be able to hear our plenary speaker, SOLAC's own Dr. Sachiko Yasuda, speak about "Beyond borders: What does it mean to be a global citizen?" back here at Centennial Hall following the student presentations. An awards ceremony recognizing outstanding presentations will follow. The intelligence, and hard work of the students who are a part of the ACE Program are an inspiration to us all, and makes it easy to believe in the hope of "New Directions for a Better Future."

Please enjoy your day at the conference!

PLENARY SPEAKER

SACHIKO YASUDA メディア研究部門 准教授 KOBE UNIVERSITY 神戸大学大学教育推進機構国際コミュニケーションセンター

SACHIKO YASUDA

is an associate professor in the School of Languages and Communication at Kobe University. where she teaches undergraduate courses in academic English and graduate courses on second language acquisition and foreign language pedagogy. She began her teaching career at the high school level in the late 1990s, and this experience motivated her to study more about how people learn another language. She then moved to Australia and received her Master's degree in applied linguistics from Monash University in 2004. After that she returned to Japan and worked as a research associate at Waseda University, where she was in charge of writing consultations at the Writing Center. In 2006, she was awarded the Fulbright Scholarship and moved to the United States to pursue a doctoral degree. She received her Ph.D. degree in Second Language Studies from the University of Hawaii at Manoa in 2012.

Beyond borders: What does it mean to be a global citizen?

The term "global citizens." also known either as international citizens or グローバル人材 (global human resources), has become a buzzword and is increasingly appearing in institutional mission statements. However, what exactly does it mean to be a global citizen? Does it refer to someone who can speak English fluently and communicate with people from different cultural backgrounds? Or, does it mean someone who has overseas experiences and knows other cultures? It could be that people conceptualize this term differently, or use it without considering its true meaning.

Having lived in many different places around the world, including Australia and the United States, I have become interested in the fact that human beings have always formed communities based on shared identities in which members articulate their shared values as well as build structures to support their beliefs. However, my experiences both overseas and in Japan have revealed that these shared values and beliefs may also reflect a collection of prejudices. "Beyond borders" is a term that may be the key to becoming a global citizen. In this plenary lecture, I will address what it really means to be a global citizen, why it matters, and most importantly, how "beyond borders" is an essential concept for Kobe University students.
