

KOBE UNIVERSITY

神戸大学 2017-2018

Message from the President

As the president of one of the oldest leading universities in Japan, I would like to extend to you a warm welcome.

Founded over 110 years ago in a cosmopolitan city, Kobe University is an academic institution that encourages an enterprising spirit and independent thinking, according to our philosophy of “integrity in theory and practice”. While upholding its traditions, Kobe University has always been committed to the creation of knowledge and new values through interdisciplinary approaches, and to solving the issues facing our society both internally and globally. We are proud that Professor Shinya Yamanaka, a Nobel Laureate in Physiology or Medicine who has made tremendous contributions to the improvement of human life throughout the world, studied here during his undergraduate education.

As one of the most comprehensive universities in Japan, with departments covering the humanities, social sciences, natural sciences, and biomedical sciences, Kobe University promotes innovative and interdisciplinary research and education in collaboration with other universities, research institutes, and industry in Japan and abroad. The Integrated Research Center of Kobe University serves as a core base for the pursuit of

advanced research under the banner of such initiatives. A total of 12 flagship research projects are being conducted at the Center, including Integrated Bio-refinery Research and the Research Project for Membrane Technology, supported by significant funding from the Japanese government.

Another key development is the establishment of a new faculty in April 2017. The Faculty of Global Human Sciences was established by combining the Faculty of Intercultural Studies and the Faculty of Human Development and provides four programs: Global Cultures, Human Development and Community, Environment and Sustainability and Child Education. Their mission is to produce collaborative, globally-minded individuals who are capable of solving societal challenges. All students must participate in study abroad programs or overseas fieldworks before they graduate. The Faculty will achieve these goals through strong international partnerships.

By promoting these international research projects and education programs, Kobe University is becoming a global hub campus where talents gather and are dispatched around the world. I extend an invitation to all students, researchers, the public and private sectors, and all people and organizations interested in studying at or collaborating with Kobe University.

TAKEDA Hiroshi
President

“Initiative for Excellence”

The title of Kobe University's vision expresses our goal to benefit society through outstanding research. The logo represents interdisciplinary collaboration between different academic fields to solve current and future social issues.

TAKEDA Hiroshi
President

International: Hub Campus

Kobe University is further strengthening its global competitiveness through four core bodies established by the **Institute for Promoting International Partnerships**: the Centre for EU Academic Collaboration, the Center for Asian Academic Collaboration, the Office of the Americas and the Center for International Education. Each Center implements initiatives for interdisciplinary collaboration and international programs.

One of the distinctive features of international activities at Kobe University is **strong partnerships with Europe**. Since 2005, Kobe University has been developing these partnerships by serving as the coordinating university for the EU Institute in Japan, Kansai (EUIJ-Kansai), establishing the Kobe University Brussels European Centre (KUBEC) in 2010 and the Centre for EU-Japan Collaborative Education (EJCE) in 2013. Since 2011, the Centre for EU Academic Collaboration at Kobe University has played a vital role as the

strategic coordinator for these efforts. To enhance our collaboration with higher education institutions, we proactively participate in research and education support schemes by the European Commission such as HORIZON2020 and Erasmus+.

In recognition of our activities in Europe, in October 2016 Kobe University invited a group of Belgian university rectors to a symposium celebrating 150 years of Japan-Belgium friendship and had the honor of holding an academic lunch with Their Majesties the King and Queen of Belgium.

Kobe University promotes the mutual exchange of students and researchers and aims to serve as a hub to facilitate connections between overseas institutions, corporations, and public organizations based in Kobe and its overseas offices.

Overseas Offices and International Activities

Joint symposium commemorating the establishment of Kobe University Liaison office in Kraków
“New Research Perspectives from Japan and Poland”

2 June 18, 2016

The First Beijing Foreign Studies University – Kobe University Joint Symposium

3 June 30, 2016

Kick Off Symposium for Honolulu Office of Kobe University

4 Sept. 23, 2016

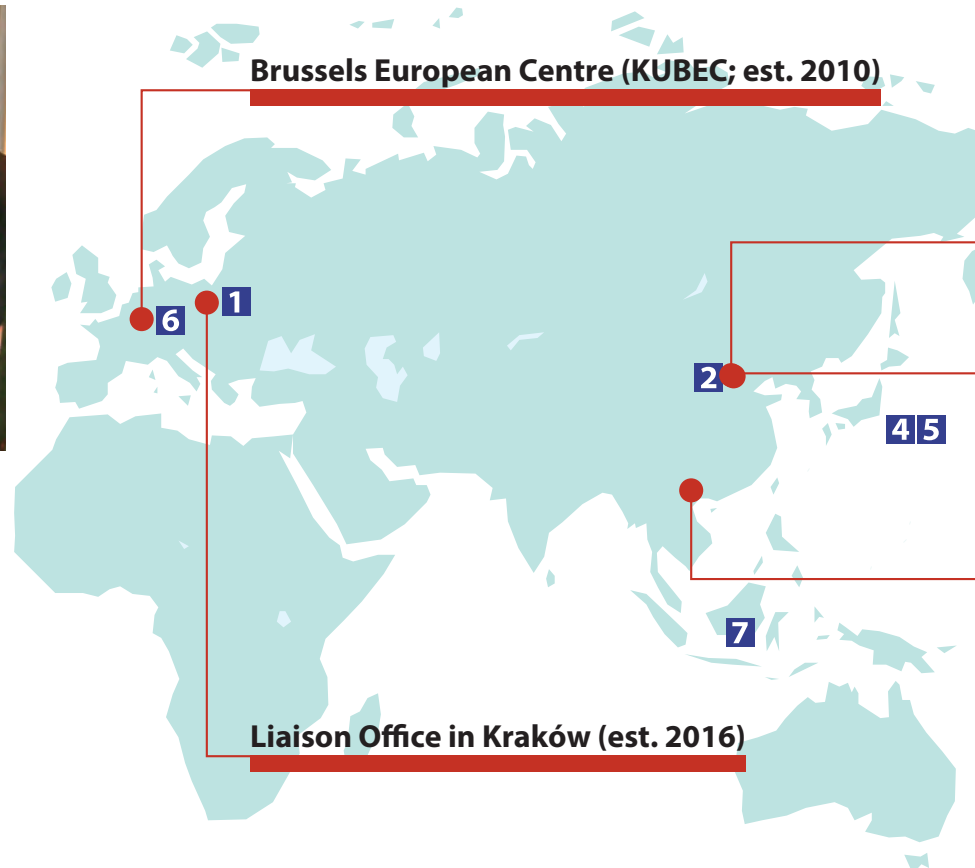

The Fourth Annual Conference: The Forum for Leaders of Japanese Studies -Japanese Studies as Public Goods-

Symposium celebrating 150 years of Japan-Belgium friendship

Joint Symposium: “New Research Perspectives from Japan and Poland”

Brussels European Centre (KUBEC; est. 2010)

Liaison Office in Kraków (est. 2016)

In June 2016, Kobe University established the **Honolulu Office of Kobe University (HOKU)** to act as a base for academic networking not only with the Americas but also with the Pan-Pacific region.

We are increasing the English-taught, globally-oriented programs at Kobe University in order to raise the international student intake. The **Kobe University Educational Program on Current Japan (KU-EPOCJ)** is an English-taught course established in April 2016. It is open to exchange students at both undergraduate and graduate levels. This course focuses on current issues in Japan covering a broad range of disciplines, including social sciences, humanities, and natural sciences. Providing opportunities for a deeper understanding of Japan from various perspectives, this English-taught program can be combined with Japanese language classes at the Kobe University Center for International Education.

Professor INOUE Noriyuki
Executive Vice President in Charge of International Exchange

“ I will strive to enable Kobe University to achieve further recognition both within Japan and overseas, and produce globally-minded graduates who can make positive contributions to society. ”

Research: Working with society, for society

Kobe University is an outstanding research university that excels in advanced interdisciplinary research. As well as inheriting the accumulated wisdom of humanity in diverse academic disciplines, we aim to create an internationally competitive, world-class base for both core and advanced research. The Kobe University Organization for Advanced and Integrated Research is an organization for cutting-edge, strategic research that transcends

the categories of science or humanities. Within this framework we have started ten new projects. Among these, Professor OKUMURA Hiroshi (Graduate School of Humanities) leads a research project which fuses humanities and system informatics in the study of local communities, and Associate Professor FUKUMOTO Takumi (Graduate School of Medicine) heads medicine-engineering research on implementing devices for medical treatment.

Unveiling the pathogenic molecular mechanisms of Fukuyama muscular dystrophy

Fukuyama congenital muscular dystrophy (FCMD) is the second most common severe childhood muscular dystrophy in Japan. I met a patient with FCMD when I was a first-year pediatric resident. Since then, it was one of my dreams to find the cure for rare, intractable diseases.

FCMD was first reported in Japan, and the responsible gene *fukutin* was also identified by Japanese researchers. Patients have a mutation in *fukutin*, originating from one Japanese ancestor around 100 generations ago. Through research in Kobe University, we have found the mechanism and therapy for FCMD. The introduction of oligonucleotides normalized protein production and functions. We are currently in the process of optimizing the oligonucleotides for future clinical use. This treatment could be applied to all FCMD patients and is expected to be the first clinical trial for the treatment of FCMD.

Basic research to find the cure for diseases is not easy, but it is worth trying.

Antisense oligonucleotide therapy for Fukuyama muscular dystrophy

MINAMOTO Toshifumi

Project Assistant Professor
Graduate School of Human Development and Environment
Aquatic ecology, Environmental physiology

<http://www2.kobe-u.ac.jp/~minamoto/index-e.html>

Environmental DNA unveils the underwater world of life

By using information from DNA dissolved in water, we can survey the types and quantities of species that live in aquatic habitats. My research group is developing technology to make this possible.

Environmental DNA analysis has advanced rapidly in the past 10 years. Kobe University occupies a central position in environmental DNA research within Japan and our research is cutting-edge by global standards. Just by collecting water samples, we can find populations of Japanese giant salamanders (a special national treasure) and record the types and quantities of fish that live in certain areas, for example. As these methods become more advanced, in addition to information about species distribution and population size, I hope we can use eDNA to learn about the condition of organisms too.

Loss of biodiversity is one of the most serious global environmental issues today. By further developing eDNA technology, I wish to contribute towards preserving our rich and varied ecosystems.

From just a few water samples we can learn what is living in underwater habitats.

Professor OGAWA Matsuto
Executive Vice President in Charge of Research and Industry-University Cooperation

“ Our challenge is to realize the vision of Kobe University as an outstanding research university. We are conducting cutting-edge research projects in collaboration with research organizations and private companies as well as local and national government. The Innovative Bio-Production Kobe project and the nationally-renowned Center for Membrane and Film Technology are notable examples. We are also focusing on advanced interdisciplinary research and opened the Graduate School of Science, Technology and Innovation. This new graduate school alongside our traditional schools will further enhance interdisciplinary research and form vital elements of our vision, helping us to achieve an excellent global university. ”

TSENKOVA Roumiana

Professor
Graduate School of Agricultural Science
Biosystem analysis

Aquaphotomics: describing the peculiarities of water on a molecular level

Recently, the importance of water attracts great attention in numerous research fields from biology, biotechnology, life science to cosmic science.

Prof. Roumiana Tsenkova has pioneered in-vivo non-invasive disease diagnosis using near infrared spectroscopy and multivariate analysis. In 2001, she discovered that water’s molecular structure, presented as a specific spectral pattern, can be used as a multiparametric marker for diagnosis. In 2005, she proposed a new scientific discipline, “Aquaphotomics”. Aquaphotomics presents water as a molecular 3D mirror when illuminated with NIR light, which can “see” the water in very subtle details as molecular and energy mirror, actuator and amplifier.

Numerous projects and papers on methods, probes and devices, algorithms for in-vivo, and in-vitro diagnosis developed in collaboration with laboratories and companies in Japan and abroad have been the result of intensive international and interdisciplinary work. Kobe University hosted the Second International Symposium on Aquaphotomics in November 2016, with participants from more than 11 countries all over the world.

SUNAHARA Yosuke

Professor
Graduate School of Law
Regional and national politics

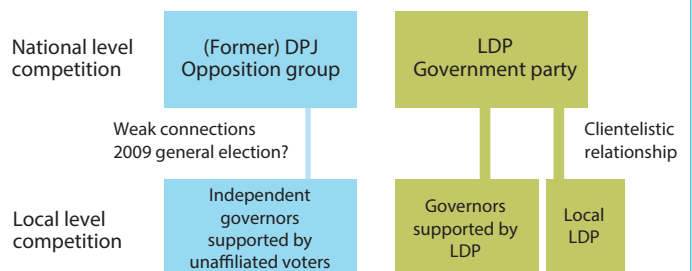

<http://researchmap.jp/sunaharay/>

Examining functions of political institutions

Local assembly members in Japanese local government are elected through the Single-Non-Transferable Voting (SNTV) electoral system, which is an unusual system in the voting world. Although the members of the House of Representatives were also elected by this system before the 1990s, the electoral system was changed in the new system. As a result, there exists a significant difference between the electoral systems of national and local assemblies.

In the SNTV system, the electorate tends to vote based on the personality of candidates rather than candidates’ party affiliation or policies. It is frequently pointed out that politicians often ignore the policy platform of political parties and try to look for the specific benefits for their supporters.

I inquire further into the effects of the electoral system, especially on the expansion of city areas, and also examine the consequences of the significant difference between national and local electoral systems.

International Student Voices

Health Sciences

Yi Qinqiuzi
People's Republic of China

I'm a second-year doctoral degree student at the Kobe University Graduate School of Health Sciences. My research interest is elder abuse, and right now I'm concentrating on the study of the recognition of health professionals about elder abuse. Studying at Kobe University makes me feel very comfortable and I really enjoy the friendly atmosphere of this university. Here, not only can I learn a lot of significant knowledge, but I can also enjoy the Japanese culture myself. In the future, I would like to return to China and pursue an academic career in health sciences at a university.

Frank Adusah-Poku
Republic of Ghana

Economics

Currently, I am a first year PhD student at the Graduate School of Economics. I am working on a nationwide household dataset to examine pertinent issues, including household energy poverty, household energy expenditure and household energy choices in Ghana. I chose Kobe University because the doctoral program offers systematic programmes providing students with the foundation to carry out individual research. Also, with an economics faculty whose members are also policy makers in reputable research institutions, it presents an opportunity to reconcile classroom work with what pertains in practice.

Matthew Robert Day
United Kingdom

Letters/Humanities

I am very happy to be studying at Kobe University; the staff, student tutors and facilities available make it a great working and living environment. Although initially settling into Japan came with its difficulties, after only a few months it became easier to call Japan home. Finding things I love doing has made me really come to love my year abroad, whether it be joining the badminton club and playing football with friends at Kobe University, participating in local events and meeting people there, going to the gym with friends or travelling all over Japan.

Nurlina Binti Azmi
Malaysia

Engineering

I'm currently a first-year graduate student studying chemical engineering in Kobe University. Studying in Kobe University has been challenging at times and yet a very memorable experience for me. At first, it was a struggle for me to adapt to the environment due to the language barrier, but I managed to overcome it through countless support from my friends and professors. I also got the chance to make close friends with not only Japanese students, but also students from other countries. Studying here has taught me many lessons that will be useful for me when I get back to my home country.

About Kobe

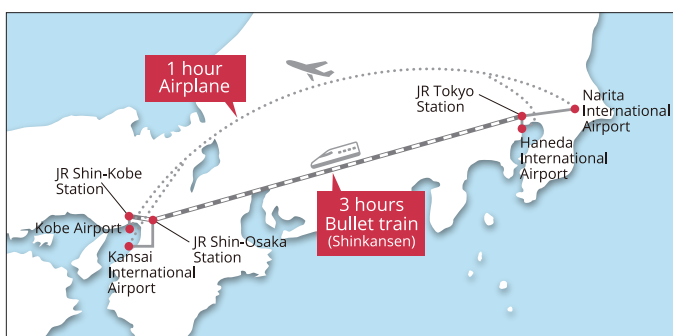

“Perched on a hillside sloping down to the sea, Kōbe is one of Japan’s most attractive and cosmopolitan cities.”
– Lonely Planet

Kobe is the capital of Hyogo Prefecture, located in the western part of Japan’s main island of Honshu. Accessible by land and sea, it is a hub for other domestic and international destinations: Himeji, Kyoto, Nara, and Osaka are all within easy reach. Sandwiched between the Rokko mountains to the north and the Inland Sea to the south, the city is blessed with a mild climate averaging 17.1°C (62.8F) with four seasonal changes.

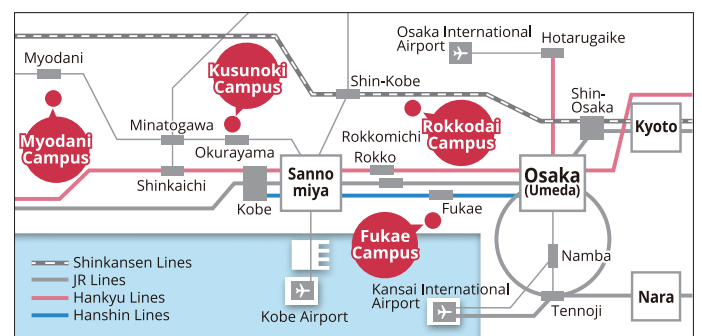

Ever since it opened to the world in 1868, Kobe has been known as a vibrant port city where people, goods, and information gather from around the world. In 2008, Kobe was granted the title ‘City of Design’ by UNESCO. It hosts many festivals, exhibitions, and sports events, as well as being a growing center for commerce and industry.

The city has a population of over 1.5 million including 43,000 foreign residents from as many as 115 different countries. With its international, open atmosphere and a rich natural environment, Kobe is uniquely qualified to support a comfortable lifestyle for any individual.

Our campuses

Letters / Humanities

At a Glance

508 Undergraduates enrolled / 217 Graduates enrolled
100 International students enrolled / 59 Faculty members

The humanities aim to understand what is at once most familiar and enigmatic to us all — we humans. Who are we, where do we come from, where are we going, and what is our purpose? Such fundamental questions never lose their significance; if anything, they become even more important in our era of globalization and IT revolution, when radical shifts in social structures require us to identify essential issues and create new values. The Faculty of Letters and the Graduate School of Humanities tackle these old and new questions by investigating human nature and the cultures that humans have produced. The Faculty is also committed to international education, with a strong emphasis on Japanese studies and a variety of exchange programs.

Faculty of Letters

The Faculty of Letters has one department (Department of Humanities) consisting of five principal research divisions, further divided into fifteen areas. First-year undergraduate students take a wide range of introductory classes to familiarize themselves with various topics in the humanities before declaring their majors around the end of the first year. Most specialized courses are offered in small-group seminars, and the Faculty boasts an outstanding student-faculty ratio of approximately 2:1 in each academic year.

Graduate School of Humanities

The Graduate School offers 2-year Master's and 3-year Doctoral programs. The research-intensive curriculum is designed to enable students to pursue in-depth research in their specialization and prepare their master or doctoral thesis.

33 International students enrolled / **167** Faculty members

Our newest faculty, established in April 2017

The Faculty of Global Human Sciences was established in April 2017, combining the Faculty of Intercultural Studies and the Faculty of Human Development. This new Faculty aims to foster graduates with a deep level of human understanding and empathy who can solve issues on a global scale and contribute to the realization of a global inclusive society.

To achieve this, the Faculty is implementing a special education program, the Global Studies Program: GSP. In this practical education program all students take part in overseas study and fieldwork, learning about global issues through practical experiences.

The Faculty of Global Human Sciences consists of the following four departments, which foster practical problem-solving abilities rooted in a broad range of expert knowledge. The Department of Global Cultures aims to solve issues relating to multicultural situations, cultural exchange and cultural conflict; the Department of Human Development and Community seeks to understand aspects of human development and consider the nature of the communities that support us; the Department of Environment and Sustainability looks at the creation and preservation of an environment that supports inclusive societies; and the Department of Child Education trains leadership for the next generation toward a global inclusive society.

Intercultural Studies

At a Glance

500 Undergraduates enrolled / **185** Graduates enrolled

154 International students enrolled / **64** Faculty members

Intercultural Studies is not a single discipline. Rather, it is a new research area focusing on the coexistence of diverse cultures and investigating new paradigms for understanding human culture across various disciplines. The Faculty and Graduate School of Intercultural Studies are committed to exploring different aspects of both change and stability in the contemporary world from the viewpoint of culture.

Faculty of Intercultural Studies

The Faculty fosters the ability to understand the many issues that face our increasingly globalized society from an intercultural perspective. To this end, the Faculty's interdisciplinary curriculum is carefully designed to help students develop both international understanding and intercultural communication skills through small-group instruction, a range of language programs, active

international exchanges, and advanced information-processing education.

Graduate School of Intercultural Studies

The Graduate School of Intercultural Studies is committed to cultivating the advanced field of cultural studies with the aim of promoting intercultural harmony, as well as constructing new paradigms for understanding human culture. The Graduate School is organized into two main departments. The Department of Cultural Interaction fosters interdisciplinary studies of intercultural relations based on the study of regional cultures, and the Department of Culture and Globalization conducts a broad range of research into languages and cultures in the context of accelerating globalization.

Human Development and Environment

At a Glance

930 Undergraduates enrolled / **265** Graduates enrolled
57 International students enrolled / **98** Faculty members

What does human development mean? It means discovering and enhancing the various abilities that a human or a group potentially possesses to achieve the well-being of each and every person. Established in 1992, the Faculty of Human Development has assumed the long tradition of the Faculty of Education. It was the first Faculty in Japan launched to conduct education and research on issues concerning human development. To promote this research, the Graduate School of Human Sciences was reorganized in 2007 and the Graduate School of Human Development and Environment was established. With approximately one hundred faculty members, our Faculty and Graduate School is a pioneering academic community pursuing the free exchange of scholarly knowledge.

The graduate program trains each student to acquire advanced skills in a specialist field by examining phenomena from a multifaceted, comparative perspective. The program offers a progressive research environment where students take the initiative in pursuing fundamental, applied and practical education, activities to foster eminent professors and researchers, and overseas study tours to conduct practical education and research.

The Faculty of Human Development has merged with the Faculty of Intercultural Studies to form the Faculty of Global Human Sciences. For more information about the undergraduate program offered by the Faculty of Global Human Sciences, see p.8.

*Law School

The Faculty of Law

The Faculty of Law aims to provide its students with a broad cultural background, combined with specialized knowledge in law and political science. We provide a comprehensive education to students who are planning to enter the legal profession, or become public administrators, diplomats, or specialists in the private sector.

The Graduate School of Law

The Department of Legal Studies and the Department of Political Science endeavor to provide students with the most current academic knowledge in the areas of law, political science, international relations, and political and diplomatic history. We strive to provide educational opportunities for future academics, business or bureaucratic specialists, and current legal professionals and others with work experience.

The Department of Professional Legal Education (Kobe University Law School) aims to train knowledgeable and skillful lawyers for the future. On the basis of the bar exam record from 2006 to 2016, Kobe University Law School ranked fifth out of 74 law schools in Japan.

The Faculty of Economics was founded in 1902 as the second oldest economics faculty among Japanese national universities. The Graduate School of Economics was established in 1953. Since then, it has produced a significant number of outstanding graduates, holding a prestigious position in economics education and research in Japan. The faculty has more than 50 academic staff, and has expanded its international collaboration. It currently offers double-degree programs with several European and Asian universities.

Undergraduate Study

Students take a set of core courses and optional courses from a variety of subjects in economics and liberal arts. Several special programs are also offered: (1) IFEEK (International Five-Year Economics Education at Kobe) Program, an integrated Bachelor–Master’s degree program with study abroad; (2) KUPES (Kobe University Program for European Studies), an integrated Bachelor–Master’s program specializing in EU studies; (3) Education for Sustainable Development Program; and (4) Econo-Legal Studies Program.

Graduate Study

We offer various Master’s programs in addition to the five-year Doctoral program: (1) General Research Program which studies specific issues in depth and (2) Recurrent Program, which updates professionals’ knowledge of economics. Programs in which all courses are taught in English are also offered: (1) International Master’s Program; (2) International Doctoral Program; and (3) Global Master Program, an interdisciplinary program combining Business Administration and Law.

*MBA

Kobe University was the first university in Japan to found an academic unit with the name "Business Administration." The School is proud of being the birthplace of business administration studies in Japan, and enjoys an excellent reputation among both the business and academic communities.

Undergraduate Program

The curriculum consists of three areas: management, accounting, and commerce. Our goal is to cultivate young leaders for business and professional societies by equipping them with practical management knowledge based upon a strong foundation in the social sciences.

Master's & Ph.D. Program

This Graduate School is a leading research institution in management. Our Master's and Ph.D. programs emphasize practical, cutting-edge research. One Master's course is primarily conducted in Japanese, and the other, the Global Master's Program (GMAP) in management, is conducted solely in English. It is also called the SESAMI Program, emphasizing Strategic Entrepreneurship and Sustainability Alliance Management along with strategy and marketing management. Graduates of the two Master's programs often advance to the three-year Ph.D. program and pursue a career in academic or research institutions.

MBA Program

In 1989, the School established the MBA program for practicing managers and professionals in response to the needs of the business community. Under the Research-Based Education pedagogy, students who share similar interests in resolving contemporary business problems form a project team, develop a research theme, and formulate a resolution by conducting field research. This MBA program is accredited by ABEST21.

Faculty of Science

The Faculty of Science conducts education and research on fundamental issues in the field of the natural sciences. We try to foster each student's creative attitude toward research as well as his or her ability to contribute to society. Approximately 100 teaching staff members provide the education for a full quota of undergraduate students every year.

Graduate School of Science

The Graduate School of Science offers a 2-year Master's and a 3-year Doctoral program. The School currently has 242 students studying for the master's degree, and 70 students studying for the doctoral degree. The doctoral program aims to train future researchers who will work at universities or research institutes. After completing the doctoral program, students are granted the degree of Doctor of Science or Doctor of Philosophy.

The Graduate School of Science collaborates closely with the following research centers: Kobe University Organization for Advanced and Integrated Research, the Biosignal Research Center, the Molecular Photoscience Research Center, the Research Center for Inland Seas, and the Research Center for Urban Safety and Security.

Center for Planetary Science

The Center for Planetary Science is attached to the Graduate School of Science and aims to promote cooperation in education and research between planetary scientists from different institutions worldwide. It provides an environment where people can assemble, exchange, and accumulate interdisciplinary knowledge to promote their research in planetary science.

Medicine

At a Glance

708 Undergraduates enrolled / 512 Graduates enrolled
49 International students enrolled / 391 Faculty members

School of Medicine

The School of Medicine emerged from the re-organization of the Prefectural Technical College of Medicine established in 1944, which subsequently became the Hyogo Prefectural College of Medicine (1946), and the Kobe Prefectural College of Medicine (1952). The Faculty of Medicine provides students with opportunities to acquire knowledge of medical ethics as well as clinical techniques, while encouraging them to be competent, conscientious medical scientists and doctors. Lectures are given by faculty members of the Graduate School of Medicine.

Graduate School of Medicine

The Graduate School of Medicine aims to drive advanced and creative interdisciplinary research and train the future leaders of biomedical sciences, clinical medicine, and medical administration. It focuses on training specialists who can identify the cause of medical problems from complex factors and manage them for the health and welfare of humanity.

The Department of Biomedical Sciences offers an opportunity for students who have majored in various fields other than medicine to acquire the core aspects of biomedical science and its applications.

Center for Infectious Diseases (CID)

Established in 2009. The purpose of the CID is to become a comprehensive hub for research and education about infectious diseases, dealing with both basic biomedical science and clinical science at the molecular, cellular, individual, and global levels.

Center for Advancement of Community Medicine (CACM)

Established in 2014, the Center aims to train healthcare professionals who can provide regional medical services within Hyogo Prefecture.

Health Sciences

At a Glance

662 Undergraduates enrolled / 270 Graduates enrolled
9 International students enrolled / 73 Faculty members

Health problems for societies in the 21st century have changed dramatically against the backdrop of the dwindling birth rate in developed countries, aging population, changing lifestyle habits, and the advent of globalization.

The role of health sciences to solve these problems is becoming ever greater. Social demands for graduate schools to foster advanced healthcare specialists, educators, researchers, and R&D are increasing.

Reflecting these needs, the former Department of Health Sciences of the Graduate School of Medicine was reorganized into the Graduate School of Health Sciences in April 2008.

With well-rounded education, rich human qualities and morality as its common base, the Graduate School aims to train the following:

- (1) Researchers with the originality and creativity to establish total health care;
- (2) Advanced healthcare specialists with abundant clinical experience, a research-focused outlook, and leadership and management ability;
- (3) University teaching staff competent in clinical practice, research and training; and
- (4) Advanced healthcare specialists with the communication ability and multicultural understanding to promote international healthcare.

For those ultimately wishing to undertake the Doctoral degree, we regard our 2-year Master's Program and 3-year Doctoral Program as one consecutive course.

International Course for Health Sciences (ICHS)

We also offer an International Course for Health Sciences (ICHS) which allows students to complete their Master's and Doctoral Programs by taking classes offered in English.

Engineering

At a Glance

2404 Undergraduates enrolled / **822** Graduates enrolled
132 International students enrolled / **156** Faculty members

The Faculty of Engineering consists of six departments: Architecture, Civil Engineering, Electrical and Electronic Engineering, Mechanical Engineering, Chemical Science and Engineering, and Computer Science and Systems Engineering. The Graduate School of Engineering consists of the first five departments, excluding Computer Science and Engineering, and offers a wide variety of education and research ranging from fundamental science and liberal arts to innovative engineering. Our goal is to develop human resources who will play leading roles in the realization of a sustainable, safe, and secure society.

Both undergraduate and graduate students are engaged in cutting-edge research at a world-class level either in individual departments or through interdisciplinary research centers and projects at the Graduate School of Engineering. Through this they are able to acquire the necessary skills to become active engineers and researchers, such as problem-solving abilities, creativity, a global mindset, and communication and presentation skills.

At present, over 1000 overseas students study at Kobe University; 132 of them are in either the Graduate School of Engineering or the Faculty of Engineering. Fostering human resources from a global point of view is one of the key missions of Kobe University. The Faculty and the Graduate School offer an excellent research and education environment and heartily welcome students from all over the world.

Courses Offered in English (AY 2017)

Twenty four percent of lectures in the Master Program are given in English.

System Informatics

At a Glance

209 Graduates enrolled

40 International students enrolled / 46 Faculty members

The Graduate School of System Informatics was established in 2010. The objective of the Graduate School of System Informatics is to educate prominent researchers and engineers who have an international mindset as well as cross-disciplinary knowledge and skills.

The Graduate School consists of three departments: the Department of Systems Science, the Department of Information Science, and the Department of Computational Science. Through the Master's Program and the Doctoral Program, students specialize in fundamental theories and methodologies of systems science and engineering, techniques and theoretical basics of information science and technology, and science and engineering based

on large-scale simulations using the power of high-performance computing. Of particular note is the Intensive Course on Computational Science, a consecutive course consisting of a Master's Program and a Doctoral Program, which provides the first-ever Ph.D. in Computational Science in Japan.

The Master's Program and the Doctoral Program are geared toward educating creative professionals who possess basic research skills that include identifying problems, designing research plans, conducting research, and organizing research results. The Graduate School of System Informatics provides an excellent environment for research and education in the emerging new field of system informatics.

Master's Program (Two-year Program) Doctoral Program (Three-year Program)

Agriculture / Agricultural Science

At a Glance

676 Undergraduates enrolled / 313 Graduates enrolled

45 International students enrolled / 78 Faculty members

The mission of the Faculty of Agriculture and the Graduate School of Agricultural Science is to develop students' intellectual foundations and endow students with the skills they need to contribute to a sustainable society that coexists with nature. In light of these objectives, we impart wide knowledge about agricultural sciences and conduct research concerning "Food, Environment, and Health/Life from Farm to Table." We carry out basic and applied research in the production and utilization of natural and agricultural resources, as well as in biotechnology and environmental conservation.

We have three affiliated Centers: the Food Resources Education and Research Center, the Center for Regional Partnership, and the

Research Center for Food Safety and Security. The Food Resources Education and Research Center has a 40 ha field and facilities for the production of rice, vegetables, fruits, grasses and Japanese Black cattle, whose meat is famous as Kobe Beef, as well as lodgings for students conducting fieldwork.

Academic agreements have been concluded with many overseas universities and research institutes in Asia, Europe, and Africa for educational and academic exchanges as well as research collaboration. The Graduate School provides advanced education to students who are planning to be researchers or professional leaders in industry, or teachers in higher education institutions.

Faculty of Maritime Sciences

The Faculty fosters experts who possess a comprehensive knowledge of the marine sciences and can use this knowledge to contribute to the field of global transportation and logistics.

The Department of Global Transportation Sciences provides students with the education necessary to be marine logistics engineers and navigation management specialists in international logistics and transportation. The Department of Ocean Safety Systems Science trains specialists in marine safety and marine environments who can contribute to the establishment of a safe and secure society. The Department of Marine Engineering educates students to become engineers who can undertake advanced work in specialized areas as well as marine engineers for large vessels' operation.

Graduate School of Maritime Sciences

The Graduate School of Maritime Sciences is composed of three divisions: Global Transportation Sciences, Ocean Safety Systems Science, and Marine Engineering. Our education and research is dedicated to cultivating creative researchers, educators and top-level professionals, who possess diverse global perspectives and problem-solving abilities.

Cooperative facilities

The International Maritime Research Center and the training ship Fukae Maru contribute to our education and research.

Sea Training

Students can advance to the Master's Program of Maritime Sciences in the Graduate School of Maritime Sciences or to the Sea Training Course after graduation.

International Cooperation Studies

At a Glance

230 Graduates enrolled

112 International students enrolled / **24** Faculty members

The Graduate School of International Cooperation Studies (GSICS) was established in 1992 and offers four academic programs, providing a number of courses taught in English. Currently, international students from over twenty countries account for about forty percent of our students. One of our aims is to train graduate students who are interested in pursuing international careers. Academic activities at GSICS, therefore, encourage our students to acquire expertise and multidisciplinary knowledge through a flexible curriculum. For the international exchange of knowledge, GSICS often convenes international conferences and symposia and invites leading specialists from all over the world to deliver special lectures and seminars.

We also encourage our students to participate in internships and placements in domestic and international organizations, and recognize the importance of these activities by awarding credits for them, as well as partially subsidizing students' travel costs. A number of students have so far taken part in internships at the World Bank, Inter-American Development Bank, JICA, JBIC (Japan Bank for International Cooperation), and a number of United Nations agencies. For students seeking employment in Japan, GSICS arranges guidance and information sharing, and for those pursuing careers in international organizations, development agencies, and private firms, GSICS organizes a series of seminars on job seeking skills. We welcome international students who wish to join our vibrant academic community.

Science, Technology and Innovation

At a Glance

81 Graduates enrolled

3 International students enrolled / 49 Faculty members

The Graduate School of Science, Technology and Innovation is an interdisciplinary graduate school newly established in April 2016 through collaboration between the natural and social sciences in Kobe University.

The mission of our school is to train individuals with a natural sciences background in research and development capabilities that can be applied to a wide range of science and technology fields, and equip them with the entrepreneurial skills to design the commercialization process of their scientific breakthroughs.

Our curriculum is based on interdisciplinary collaboration between the natural and social sciences. The natural science areas (Bioproduction, Advanced Membrane Technology, Advanced Information and Communication Technology, and Advanced Medical Science) are Kobe University's flagship research areas. In the area of Business Administration, Kobe University has been recognized for achieving outstanding results in education and research.

The curriculum includes a number of practical subjects. For example, in "Project-Based Learning for Entrepreneurship in Science and Technology", every student draws up a concrete business plan, and in "Industrial Technology Practice", professionals provide education utilizing various pilot plants. Every area of the natural sciences offers an introductory class to provide students with the opportunity to expand their scopes of interest.

In our graduate program, students acquire high levels of expertise in their specialized areas, interdisciplinary perspectives based on fundamental knowledge of other areas, and basic knowledge and practical skills in the social sciences essential for enterprise creation.

Research Institute for Economics and Business Administration

Established in 1919 as the Commercial Research Institute of the Kobe Higher Commercial School, the Research Institute for Economics and Business Administration (RIEB) has the longest history of all social science research institutes affiliated to national universities in Japan.

Our primary objective is to advance the frontiers of academic research in the fields of economics and business administration, emphasizing publications in international refereed journals. In 2011, RIEB launched The Japanese Accounting Review (TJAR), currently the only international refereed journal in accounting based in Japan.

Another important objective of RIEB is to collect and maintain historically valuable materials. The affiliated Integrated Center for Corporate Archives collects and maintains historical documents pertaining to business administration. Our collections include highly-regarded archives such as the "Kanebo Collection" and the

"Kanematsu Collection." In 2014, the RIEB Business Mechanization Exhibition was certified as a 'Satellite Museum of Historical Computers' by the Information Processing Society of Japan.

For further details regarding RIEB, please visit our website at:

Info <http://www.rieb.kobe-u.ac.jp/index-e.html>

University Hospital

Kobe University Hospital first opened its doors in 1869 as Kobe Hospital. It has been operating as part of Kobe University since 2004, and in 2007 it was designated a regional cancer treatment hospital. The inclusion of a heliport allows the hospital to function as a disaster-base hospital, supporting the local residents' emergency care needs. It consists of 36 clinical divisions with 934 beds.

Our hospital has always been strongly rooted in the local community and has made it one of its missions to contribute to community medicine. We also aim to nurture physicians who are rich in compassion and humanity, and to develop as a leading center for state-of-the-art research and clinical care.

One of the primary principles of this hospital is patient-focused medical care. Physicians, nurses, and medical staff of various disciplines work together as a team to provide caring and highly advanced treatment to our patients. In addition, we attempt to keep our system easy for our patients to understand, to improve our patient services, and to fortify strategies to ensure medical safety.

Our goal is a Kobe University Hospital that boasts a world-class level of care, while maintaining an open ear to our patients. We hope to continue our efforts towards these objectives.

Opened April 2017 International Clinical Cancer Research Center (ICCRC)

The International Clinical Cancer Research Center (ICCRC) is part of the Kobe University School of Medicine and a new base for medical care, research and education. It opened in April 2017 at the Kobe Biomedical Innovation Cluster on Port Island. The Center aims to create opportunities for the next generation of medical specialists, develop advanced surgical treatment for cancer, engage in cutting-edge treatment, research and develop new medical equipment, and serve as an international base for medical research and education.

Organization for Advanced and Integrated Research

The Organization for Advanced and Integrated Research aims to create an environment for strategic, cutting-edge, integrated research that crosses the boundaries between the humanities and sciences and is not limited by preexisting specialist research fields. Our research results will be used to advance education within the University and contribute to society through collaboration with other organizations and institutions.

The Organization is divided into two: the "Primary Research Area" for flagship research that is advanced and integrated, and the "Emerging Research Area", an interdisciplinary group for preparing primary research. Through tailored, project-based research, we will pioneer new academic fields.

University Libraries

Library for Social Sciences

Library for Science and Technology

Kobe University Library has a collection of about 3,700,000 bibliographical materials. The Library is comprised of the General Library and 9 branches divided by subject. They are located in the Rokkodai, Kusunoki, Myodani, and Fukae campuses.

Each library provides a wide range of books and journals for students and faculty to advance their education and assist their research. They can also use the online delivery service to order books from other campus libraries. Moreover, convenience is improving for students, such as discussion-based learning at the Learning Commons.

In 1999, "Digital Library System" was launched. It provides digitized collections for users inside and outside the campus via the internet (<http://www.lib.kobe-u.ac.jp/dlib/e-index.html>). "The Earthquake Disaster Materials Collection (EDMC)" holds over 50,000 materials related to the Great Hanshin-Awaji Earthquake. The EDMC is open to the public, with the aim of contributing to the development of earthquake-related research such as emergency restoration and disaster prevention measures.

Welfare

Medical Center for Student Health

The Medical Center for Student Health was established in April 1970. Services provided by the Center include an annual medical checkup for all students and staff, special checkups for people working with X-ray, radioisotope and other harmful substances, as well as a medical checkup for new international students. Emergency medical treatment is also available. There are doctors and nurses as well as counsellors to provide consultation and advisory services on physical and mental well-being. The Medical Center for Student Health also plays an important part in creating a safe and hygienic educational environment, through Health and Safety activities administered by qualified doctors.

Info

<http://www.health.kobe-u.ac.jp/>

Support Center for Campus Life

This Center provides consultations and assistance in cases when a member of the University is experiencing disability-related difficulties or worries regarding their studies or university life.

We will work with your department to meet your needs, including support for lectures, course registration, and examinations.

For International Students and Researchers

International Student Section in the Center for International Education (CIE)

The International Student Section in the CIE (formerly the International Student Center) was established as a university-wide research and teaching facility in April 1993. The Section assumes overall responsibility for international students, including the provision of Japanese language instruction, Japanese studies courses, advice on studying and living in Japan, career advice, and alumni networking. The Section also undertakes research and development to promote international study exchange programs, such as supporting Japanese students at Kobe University wishing to study overseas. In addition, the Section actively promotes international exchange programs in the local community, working with regional government agencies, local volunteer organizations, schools and companies.

Info http://www.kisc.kobe-u.ac.jp/english/i_topics.html

are exclusively for international students and researchers, however, other dormitories are for both international and Japanese students at Kobe University. The resident fees vary by room type. There are also boarding houses run by public and private organizations available for international students and researchers.

Accommodation

Kobe University has several dormitories for international students and researchers located within commuting distance. These are: Kobe University International Residence, Sumiyoshi International Student House, Sumiyoshi Residence, Joshi-Ryo, International House (at Fukae Campus), Hakuo Dormitory and Kokui Residence. Kobe University International Residence and International House

Residence	Commute	Map
1 International Residence	To Rokkodai Campus, 30-40 min. by Port-liner and Hankyu train	
2 International House (Fukae area)	To Rokkodai Campus, about 50 min. by train and bus To Fukae Campus, about 8 min. on foot	
3 Sumiyoshi International Student House (students only)	To Rokkodai Campus, 40-50 min. either on foot or by bus and train	
4 Sumiyoshi Residence (male students only)	To Rokkodai Campus, 40-50 min. either on foot or by bus and train	
5 Joshi-Ryo (female students only)	To Rokkodai Campus, 40-50 min. either on foot or by bus and train	
6 HAKUO Dormitory (Fukae area) (students only)	To Rokkodai Campus, about 50 min. by train and bus To Fukae Campus, about 10 min. on foot	
7 KOKUI Residence (students only)	To Rokkodai Campus, 30 min. by bus and on foot	

Rent Subsidy System

Kobe University has a rent subsidy system for eligible international researchers who agree to live in one of the public-run apartments designated by the University in the event there is no room available in either the International Residence or International House. Under

this system, the University will pay approximately half the monthly rent. However, residents themselves must pay utilities.

Academic Exchange Agreements

Kobe University conducts extensive academic exchanges with partner universities and institutions overseas, enriching our academic environment. The University currently has 334 partner institutions in 60 countries/regions. Agreements with those marked "★" have a mutual tuition waiver clause, which makes it possible to implement student exchange and encourage student mobility.

	USA	Boston College	Department of Economics	Graduate School of Economics	2012
		Brandeis University	Graduate School of International Economics and Finance	Research Institute for Economics and Business Administration	1997
		Emory University	School of Medicine	School of Medicine	1983
		FHI360		Graduate School of International Cooperation Studies	2011
		The University of Tennessee, Knoxville *		Faculty of Global Human Sciences, Graduate School of Intercultural Studies	2012
		University of California, Irvine	Jack W.Peltason Center for the Study of Democracy	Graduate School of Economics	2016
		University of Georgia *		Faculty of Global Human Sciences	2015
		University of Hawaii *	John A. Burns School of Medicine	School of Medicine, Graduate School of Medicine	2016
		University of Maryland, College Park *		Graduate School of Intercultural Studies, Faculty of Global Human Sciences	2016
		University of Southern California	Viterbi School of Engineering	Graduate School of Engineering, Graduate School of System Informatics, Education Center on Computational Science and Engineering	2016
		University of Washington *	College of Engineering	Faculty of Engineering	1980
	School of Business Administration	School of Business Administration	1996		
University of Wisconsin-Madison	College of Engineering	Faculty of Engineering	1983		
Utah State University *	College of Humanities and Social Sciences	Graduate School of Intercultural Studies, Faculty of Global Human Sciences	2012		
Yale University	Economic Growth Center	Research Institute for Economics and Business Administration	2007		
Latin America	Brazil	Federal University of Rio de Janeiro	Institute of Economics	Research Institute for Economics and Business Administration	2010
	Chile	The United Nations Economic Commission for Latin America and the Caribbean (ECLAC)		Research Institute for Economics and Business Administration	2010
	Costa Rica	University for Peace		Graduate School of International Cooperation Studies	2007
Europe	Austria	Johannes Kepler University Linz *	Research Institute for Symbolic Computation (RISC)	Graduate School of Human Development and Environment, Graduate School of Science	2015
		Vienna University of Economics and Business Administration *		Graduate School of Business Administration, School of Business Administration	2012
	Belgium	Bruegel		Graduate School of Economics	2013
		Université catholique de Louvain *	Faculty of Pharmacy and Biomedical Sciences, School of Biomedical Sciences	Graduate School of Medicine, The Biosignal Research Center	2015
			School of Economics	Graduate School of Economics	2016
	Bulgaria	Trakia University	Faculty of Agriculture	Faculty of Agriculture, Graduate School of Agricultural Science	2016
		University of Food Technologies		Graduate School of Agricultural Science	2015
	Croatia	University of Rijeka *	Faculty of Maritime Studies	Faculty of Maritime Sciences, Graduate School of Maritime Sciences	2016
	Finland	Tampere University of Technology *		Faculty of Engineering	1989
		University of Helsinki *	Department of World Cultures	Faculty of Global Human Sciences, Graduate School of Intercultural Studies	2015
	France	BRGM (Geological Survey of France)		Research Center for Urban Safety and Security	2006
		Claude Bernard University - Lyon1		Graduate School of Science	2015
		Côte d'Azur Observatory *		Graduate School of Science	2012
		ESCP EUROPE *		School of Business Administration, Graduate School of Business Administration	1982
		Groupe Kedge Business School *		School of Business Administration, Graduate School of Business Administration	2014
		Institut de Physique du Globe de Paris *		Graduate School of Science	2016
		Institut National des Sciences Appliquées de Lyon *		Faculty of Engineering, Graduate School of Engineering, Graduate School of System Informatics, Faculty of Maritime Sciences, Graduate School of Maritime Sciences	2015
		Laboratoire National des Champs Magnétiques Pulsés		Molecular Photoscience Research Center	2003
		Sciences Po Lille *		Graduate School of Law, Faculty of Law	2015
Stendhal University - Grenoble 3 *			Graduate School of Intercultural Studies	2015	
Université Pierre Mendés France		The Law Faculty	Graduate School of International Cooperation Studies	2013	
Université de Rennes 1 *	IGR-IAE de Rennes	Graduate School of Intercultural Studies, Faculty of Global Human Sciences	2017		
Germany	Albert-Ludwigs-University of Freiburg	Faculty of Biology	Faculty of Science	1990	
	Asklepios Medical School *		Graduate School of Medicine, School of Medicine	2015	
	EBS University of Business and Law *	Business School	Graduate School of Business Administration	2013	
	Freie Universität Berlin *	Department of History and Cultural Studies, Academic Division Art History of East Asia	Graduate School of Intercultural Studies	2013	
	Georg-August-University of Göttingen *	Faculty of Biology and Psychology	Graduate School of Engineering, Graduate School of Agricultural Science, Graduate School of Science	2014	
	Faculty of Economic Sciences	School of Business Administration, Graduate School of Business Administration	2013		

Academic Exchange Agreements

Inter-Faculty/Graduate School Agreements (232 institutions)

(As of May 1, 2017)

Area	Country/Region	Overseas University/Institute	Faculty/Graduate School	Kobe University	Year of Conclusion	
Europe	Germany	Institute of Solid State Research at the Leibniz Institute for Solid State and Materials Research		Molecular Photoscience Research Center	2013	
		Kiel University *	Faculty of Business, Economics, and Social Sciences	Graduate School of Business Administration	2014	
			Faculty of Engineering	Graduate School of Economics Faculty of Engineering, Graduate School of Science and Technology	2014 2000	
		Leipzig University *	Faculty of History, Arts and Oriental Studies	Graduate School of Intercultural Studies, Faculty of Global Human Sciences	2013	
		Martin Luther University Halle-Wittenberg *	Faculty of Philosophy I	Faculty of Letters, Faculty of Global Human Sciences, Graduate School of Intercultural Studies, Graduate School of Humanities	2015	
		Osnabrück University *	School of Law	Graduate School of Law	2014	
		Technical University of Dresden *	School of Science	Graduate School of Human Development and Environment, Faculty of Human Development	2015	
		University of Hamburg *	Asia-Africa Institute, Faculty of Humanities Faculty of Law	Faculty of Letters, Faculty of Global Human Sciences, Graduate School of Intercultural Studies, Graduate School of Human Development and Environment, Graduate School of Humanities Graduate School of Law	2013 2015	
		University of Marburg *	School of Business & Economics	Faculty of Economics, Graduate School of Economics	2017	
			WHU - Otto Beisheim School of Management *		Graduate School of Business Administration	2006
		Greece	Aristotle University of Thessaloniki I		Faculty of Engineering, Graduate School of Engineering, Research Center for Urban Safety and Security	2013
		Ireland	Dublin City University *		Faculty of Economics, Graduate School of Economics	1992
		Italy	IASI-CNR (Institute for Systems Analysis and Computer Science-National Research Council)		Graduate School of System Informatics	2013
			ITIA-CNR (Institute of Industrial Technologies and Automation - National Research Council)		Graduate School of System Informatics	2010
			University of Bologna *	Advanced School of Modern Languages for Interpreters and Translators, Department of Interdisciplinary Studies on Translation Faculty of Engineering	Graduate School of Intercultural Studies, Faculty of Global Human Sciences Graduate School of Science and Technology, Faculty of Engineering	2014 2002
			University of Florence *	Department of Industrial Engineering	Graduate School of Engineering	2015
			University of Milan *	Department of Private Law and History of Law Department of Italian and Supranational Public Law and Department of Legal Sciences 'Cesare Beccaria'	Faculty of Law, Graduate School of Law	2017
			University of Naples L'Orientale *		Faculty of Intercultural Studies, Graduate School of Intercultural Studies	2014
			University of Naples Federico II		Faculty of Intercultural Studies, Graduate School of Intercultural Studies Faculty of Law, Graduate School of Law	2016 2015
			University of Parma *	Department of Economics	School of Business Administration, Graduate School of Business Administration	2013
		Netherlands	Tilburg University *	Tilburg School of Economics and Management	Faculty of Economics, Graduate School of Economics	2016
			University of Groningen	Groningen Biomolecular Sciences and Biotechnology Institute (GBB)	Organization of Advanced Science and Technology	2010
					Graduate School of Engineering, Graduate School of Agricultural Science	2014
		Norway	Norwegian School of Economics and Business Administration *		Graduate School of Business Administration	2004
			Oslo and Akershus University College of Applied Sciences	Faculty of Education and International Studies	Graduate School of Human Development and Environment	2013
			University of Bergen *	Faculty of Humanities	Graduate School of Intercultural Studies, Faculty of Global Human Sciences	2015
			University of Oslo	Faculty of Mathematics and Natural Sciences	Graduate School of System Informatics, Education Center on Computational Science and Engineering	2016
		Poland	Jagiellonian University *	Faculty of Philosophy	Faculty of Letters, Graduate School of Humanities	2012
			University of Gdańsk *	Faculty of Economics	Faculty of Economics, Graduate School of Economics	2014
		Portugal	University of Coimbra *	Faculty of Economics	Faculty of Law, Graduate School of Law	2010
		Russia	Penza State University of Architecture and Construction		Graduate School of Human Development and Environment	2011
			Russian Academy of Sciences	General Physics Institute	Molecular Photoscience Research Center	2003
		Serbia	University of Belgrade *	Faculty of Mechanical Engineering	Graduate School of Agricultural Science	2011
		Spain	Autonomous University of Barcelona *	Engineering School Faculty of Translation and Interpreting and Graduate School (Department of Translation and Interpreting)	Graduate School of System Informatics Faculty of Global Human Sciences, Graduate School of Intercultural Studies	2017 2013
			Barcelona Centre for International Affairs		Graduate School of Intercultural Studies	2015
			University of Barcelona *	Faculty of Economics and Business	Graduate School of Economics	2014
		Sweden	University of Gothenburg *	School of Business, Economics and Law	Graduate School of Business Administration, School of Business Administration	2012
		UK	Cardiff University *	Cardiff Business School	Graduate School of Business Administration, School of Business Administration	2004
				Cardiff Business School, Cardiff School of Social Sciences, Cardiff School of Engineering	Faculty of Maritime Sciences, Graduate School of Science and Technology	2005
			Institute of Education, University of London *		Graduate School of Human Development and Environment Graduate School of International Cooperation Studies	2015 2015
			Queen Mary, University of London *	School of Law	Graduate School of Law	2017
			University of East Anglia *	School of International Development	Graduate School of International Cooperation Studies	2015
			University of Manchester *	Faculty of Humanities	Faculty of Global Human Sciences, Graduate School of Intercultural Studies	2013
			University of Sussex	School of Education and Social Work	Graduate School of International Cooperation Studies	2010

Organization Chart
