

The Faculty of Medical Device Engineering at Kobe University's School of Medicine aims to develop human resources who are equipped with humanity, creativity, and international awareness, as outlined in the diploma policy of Kobe University, and who should possess comprehensive knowledge and an interdisciplinary perspective, particularly in the field of medical device development. These individuals should be forward-thinking and acquire the basic skills necessary to identify challenges and innovative solutions.

In order to achieve these educational objectives, the Faculty has established the following policies for conferring the bachelor of Medical Engineering, based on the university's policy for conferring degrees.

1. The Faculty has set its learning goal as acquiring the following abilities in addition to the virtues prescribed by the university's policy on conferring degrees.

- Fundamental abilities to contribute to society through the creation of new medical innovations, grounded in a rich sense of humanity and strong ethical principles, with deep respect for the sanctity of life. (Humanity and ethics)
- The ability to understand the needs of both domestic and international medical and healthcare environments and to make meaningful contributions to local and global communities through the practical application and implementation of medical devices and systems. (Regionality and international awareness)
- A solid foundation of medical and healthcare knowledge, as well as engineering skills essential to device development, and the ability to design, develop and deliver the most appropriate medical devices and systems to meet the needs of society. (Expertise and creativity)
- The ability to identify societal needs, develop innovative solutions, address challenges in implementation and dissemination, and contribute to shaping the society of the future. (Expertise and creativity)

2. The Faculty's graduation requirements for conferring a bachelor of Medical Engineering are to attend Kobe University for the prescribed period of time, to acquire the credits stipulated in the university's rules for the Faculty of Medical Device Engineering, and to achieve the learning goals set by the university and the Faculty.
